## Projects

- Thief Prediction System  
*Thesis - Vue JS, Laravel, Python* 2024 - 2025  
Our team created a system that tracks the movement of a person, and if malicious movements are detected, we take a screenshot and data then send it to the backend, and show it on our frontend.
- Rweb System  
*Full Stack (Laravel and Laravel Blade)* 2025  
We created a system where social media managers, web developers, and graphics designers are able to get job orders, and also they are able to send and track their works on the website.
- Forever Ecommerce  
*Full Stack (MERN Tech)* 2025  
I created a full stack using MERN Tech (MongoDB, Express, React, NodeJS) It includes an admin panel where the seller can input the details of the product, such as the image, name, etc.
